

# Anthony Sourice Joins SIG France

SIG France reports the appointment of Anthony Sourice to the position of research and development manager. Anthony is a PhD engineer in signal processing, and will be in charge of the different R&D projects of SIG, oriented towards the digital signal reception and also innovations in seismic signal emission.

Anthony started his career in the academic world, at ESEO (Ecole Supérieure de l'Electronique de l'Ouest) in the Signal Processing and Telecommunications department and as researcher in the group GSII (Group Signal Instrumentation and Image). After an experience at SERCEL he was ready to integrate a human-size company to initiate projects and follow the development of new equipment from the initial idea to the final introduction on the market.
