

EIVA Dives Further into Mediterranean

This week saw the signing of a representative agreement under which Italian Marine ONE will include EIVA hardware and software solutions for offshore construction and subsea surveying operations in its product portfolio. Marine ONE will be the first company in Italy to hold the title of authorised EIVA representative. Marine ONE is headed by Dr Aldo Monaca, who has many years' experience in the surveying discipline.

The company will strive to also become training partner in Italy and nearby countries such as Malta.

EIVA Day Italy 2015

The new agreement kicked off with an EIVA Day Italy in Sicily on 27 October at the Nautical College of Catania (Istituto Tecnico Nautico Statale Duca degli Abruzzi), at which both EIVA and Marine ONE were present. The event offered offshore professionals a chance to learn more about EIVA's solutions and services and how the company in cooperation with Marine ONE can contribute to ensuring more efficient offshore operations both time- and cost-wise.
