

## Micro-ROV to Access All Oceans

All Oceans Engineering of Aberdeen, UK, have released details of their new vehicle, the MAC-ROV, and a range of deployment options. The MAC-ROV makes Access to All Oceans a reality for more people and more vessels.

The company went public with the fact that they were developing a <u>new small ROV</u> in February 2016. They did not say how big it was, but they did qualify it as reinforcing the company's position at the forefront of Fly-out ROV systems and technology. They added that it would also be available as a surface deployed system.
