

New Maltese ENC Coverage

IC-ENC released the first Maltese (MT coded) ENC on Friday 29 July 2016, with more to follow in upcoming weeks. Since the Ports and Yachting Directorate for Transport Malta joined IC-ENC in February 2016, IC-ENC has been working closely with Malta in order to develop its ENC production capacity.

This is a great step forward for Malta in terms of providing important coverage for the region. It means that IC-ENC has reached a significant milestone of having more than 6,000 ENCs in its folio, which now accounts for 40% of the global folio of released ENCs.
