

RIEGL Presenting at HYDRO2015

HYDRO2015 will be held at the CTICC in Cape Town, South Africa, from 23-25 November 2015. During the presentation 'Report on latest performance tests with the RIEGL VQ-880-G Laser Scanner', the latest news on the new topo-bathymetric airborne laser scanning system, the RIEGL VQ-880-G, is to be highlighted.

The RIEGL experts are available at Booth 36 showing RIEGL product portfolio for terrestrial, mobile, airborne, and UAV-baser laser scanning.

About 350 delegates from the sector hydrography, civil engineering, oceanography, geophysics and marine resource management and other associated fields from more than 40 countries will come together to talk about the latest techniques and developments. The theme for the conference is: 'Defining the extent and ownership of maritime real estate for development in Africa'.
