

Seascope Subsea Technology to Distribute Impact Subsea Products

UK-based Impact Subsea is pleased to announce the appointment of Seascope Subsea Technology BV as distributor of Impact Subsea products for The Netherlands and Belgium. Seascope will provide local support for Impact Subsea's range of innovative underwater products including the ISA500 and ISD4000 sensors.

[Impact Subsea](#) is a provider of highly innovative underwater products, primarily for ROV and AUV applications. The company pioneered the [ISA500](#) - the world's first underwater Altimeter with integrated Heading & Motion Reference. Impact Subsea launched the [ISD4000](#) early in 2016 – a survey-grade depth & temperature sensor with integrated HMRU.

Founded in 1992, [Seascope](#) has established itself as a leading supplier of underwater equipment, systems and services. Seascope's strong technical capability and customer focus make it an ideal partner for Impact Subsea.
