

SeeByte Gets Office in Marine Robotics Innovation Centre

SeeByte, UK, will be expanding their offices and taking space in the Marine Robotics Innovation Centre at the National Oceanography Centre (NOC) in Southampton. Bob Black, CEO at SeeByte, considers this as an ideal position to meet the requirements of their customer base in the South of England and continue their ongoing positive relationship with NOC.

The Marine Robotics Innovation Centre has been chosen as Seebyte is keen to work alongside like-minded companies.

Kevin Forshaw, Associate Director, Innovation and Enterprise at the NOC added that the institute have collaborated with SeeByte on several R&D projects to date and having them

on site is expected to stimulate further collaboration in the future.
