

STR's New Calibration Laboratory Receives Valeport Accreditation

Subsea Technology & Rentals Ltd (STR), UK, has received accreditation to supply third-party calibration services on Valeport hydrographic and oceanographic instruments. Calibration services are the latest offering from STR to provide customers with access to local and efficient asset management services.

Neil Jackson, sales and operations manager at STR, said that with guidance from Valeport, the new calibration laboratory is equipped with advanced instruments and is operated by trained engineers. This accreditation is independent recognition of the firm's technical competence and demonstrates STR's commitment to providing the highest service to its clients.
