

CP-100 CP Probe

Outland Technology has introduced an underwater CP probe, model CP-100. Manufactured to be robust and reliable, the CP-100 features dual cell technology for the most accurate and reliable CP readings as well as a hardened stainless tip to stand up to the abuse of offshore environments.

CP-100 is suitable for both contact and proximity readings. Available with both Diver-held and ROV mounts and multiple connector options, the Outland Technology model CP-100 will handle all cathodic inspection needs.
