

# EIVA Appointed Representative in Indonesia

EIVA started 2016 on a high note by adding the survey equipment and solution provider PT Geotronix Pratama Indonesia as its newest representative. With this collaboration, EIVA continues to expand its presence in Southeast Asia.

The Danish software and hardware engineering specialist EIVA has welcomed PT Geotronix Pratama Indonesia to its worldwide network of representatives as of January 2016. Geotronix, a survey technology provider, will offer its customers in Indonesia both EIVA hardware and software solutions. This cooperation will strengthen EIVA's activities in Southeast Asia.

The applications of the EIVA product portfolio encompass a vast variety of activities, and Southeast Asia sees them all. EIVA recognises the great potential in the Southeast Asian region, with Indonesia being a country of particular focus. Geotronix, which EIVA has worked with on previous occasions, will take on the promotion of EIVA's full suite of products and solutions in Indonesia.
