

INSTALL Hosts Geosoft Oasis Montaj UXO Survey Course

At its academy in Naples, INSTALL (Italy) hosted a complete 4-day course on the Oasis Montaj software, in which all the aspects of the processing of data acquired from a magnetometer, mainly from UXO survey jobs, were examined.

The class was taught by Geosoft-certified instructors who illustrated the various features of the Oasis Montaj software to the INSTALL personnel.

A well-trained, specialised and skilled workforce is the key factor that determines the company's present success and its future.
