

# UK HQ for Offshore Geophysical, Geotechnical and ROV Survey

In recent years GEOxyz has moved into the offshore markets with the purchase of dedicated vessels and utilising vessels of opportunity. In the UK, the company has established a headquarter for offshore geophysical, geotechnical and ROV survey. Sarah Cashmore has been appointed as general manager.

Sarah launched her career as an offshore Geophysicist at Gardline in 1996, has held senior positions at UTEC Survey, RPS Energy and most recently as operations director at Calecore and survey manager at Alcatel Submarine Networks.

GEOxyz has developed into a survey company employing over 110 people across five European bases. GEOxyz owns and operates 16 vessels as well as an extensive range of

seabed mapping and sampling equipment, which is deployable across their vessel, ROV, drone and surface mapping platforms.
