

# AXYS Selects GSE Rentals as Rental Services Provider

As part of its international expansion, AXYS Technologies (AXYS), has selected GSE Rentals, a Unique Group company, as its equipment lease partner. Graham Howe, sales director for Europe, regards GSE Rentals as a well-respected provider of equipment lease services to the offshore industry. According to him, being a part of the Unique Group in Middle East makes this a fit with AXYS' strategy of partnering with industry leaders that bring the range of metocean data solutions to the global market.

According to Alan Cameron, general manager of [GSE Rentals](#), the [TRIAXYS with Currents buoy](#) is an ideal platform for the metocean market and he is pleased to work with AXYS to offer services to their clients. TRIAXYS buoys use a rugged, solid-state wave sensor and feature dual primary telemetry with two-way communications for easy remote

diagnostics and configuration changes.

GSE has already provided the TRIAXYS Wave & Current buoy on a range of projects. AXYS plans to build on this foundation with additional systems in the near future.
