

Beijing NCG Information Partners with IVS 3D

IVS 3D is starting a partnership with Beijing NCG Information Technology Co. to provide sales, support, and training to Fledermaus clients located in China. Beijing NCG Information Technology Co., also known by association with the Institute of Remote Sensing Applications, is a recognised leader in remote sensing technology and applied research.

Grace Dai, representative for NCG, said of the collaboration with IVS 3D, "Our goal in cooperation with IVS 3D is to advance and implement key integrated remote sensing technology applications for the multi-dimensional development of information technology and services in China. The compatibility of Fledermaus with other GIS and remote sensing applications makes it an invaluable tool towards that goal."

Douglas Bergersen, Regional Managing Director for IVS Asia-Pacific, stated, "The addition of NCG as a reseller and support group further strengthens IVS' commitment in this region. I look forward to working with NCG's sales and technical teams to address the needs of clients.

"Because NCG is a recognised leader in remote sensing technology, they are also a key component for the integration and industrialization of the Fledermaus suite in China." said Bill McKernan, VP of Sales and Marketing for IVS 3D. "We expect that the partnership with NCG will help us to further innovate the Fledermaus Suite as we continue to keep in step with industry trends and demands."
