

# Bibby Line Group Companies Represented at WindEnergy Hamburg

Bibby HydroMap, Bibby Offshore and Bibby Marine Services will all be exhibiting at the WindEnergy trade event in Germany, running from 27-30 September 2016 at Hamburg Messe & Congress. Between them, the services offered by the three companies cover the entire project life cycle, from pre-construction survey through to array cable installation, post construction monitoring and operations

and maintenance activity.

With almost 20 years' experience, Bibby HydroMap offer a range of services including geophysical, UXO and ROV survey, geotechnical sampling, cable depth of burial tracking and scour monitoring. Bibby HydroMap will be showcasing their capabilities on their Stand B4.EG.423 through innovative content and interactive activities to both inform and immerse visitors at the industry leading event.

## ***Bibby Wavemaster 1 Service Operations Vessel***

Bibby HydroMap's sister company Bibby Marine Services will also be in attendance at the event, showcasing a scale model of their purpose-built Service Operations Vessel, *Bibby WaveMaster 1*. Stephen Blaikie, chief executive officer and Stephen Bolton, commercial director will be situated on the Dutch shipbuilder's stand, Damen Shipyards B4.EG.408.

Bibby Offshore, part of Bibby Line Group will also be exhibiting at this year's show. Building on more than 10 years of global, safe and successful project delivery, Bibby Offshore will be offering a range of services in the renewables sector. Bibby Offshore's representatives will be located within the Scottish Development International (SDI) area in Hall B2, Ground floor, Stand 237.11.
