

Contros Opens Service Site in North America

CONTROS Systems and Solutions, Germany, has announced a new service site in North America - Kongsberg Underwater Technology Inc. (KUTI). CONTROS's™ customers in North America are now able to ship products to the KUTI office in Lynnwood, WA for service and maintenance.

In 2013, Kongsberg Maritime AS, a wholly owned subsidiary of Kongsberg Gruppen ASA (KONGSBERG), acquired 10% of the shares and entered into a cooperation agreement with CONTROS Systems & Solutions GmbH.

Since 1990 Kongsberg Maritime subsidiary Kongsberg Underwater Technology has been established in Lynnwood, Washington, USA as the North American centre for hydro-acoustic systems engineering, integration and customer support. After acquisition of the exclusive commercial license for the Seaglider system from the University of Washington in May 2013, KUTI has also established a development, manufacture, sales and support facility for the KONGSBERG Seaglider Autonomous Underwater Vehicle (AUV).
