

EdgeTech to Hold On-water Demonstrations

EdgeTech, USA, will be conducting on-water equipment demonstrations during [MTS TechSurge in Ft. Lauderdale, FL, USA](#), taking place from 26-28 October 2016. EdgeTech will be showcasing the [6205 Multi Phase Echo Sounder \(MPES\)](#) and the [4125 ultra-high resolution, lightweight sidescan sonar](#) system. EdgeTech will hold the demonstrations on board one of the two company-owned research vessels, the *Ocean Researcher II*.

The vessel is docked in Ft. Lauderdale and used to support the company's local research and development office. Also during the conference, EdgeTech will be giving a talk on the latest bathymetry technology. Please see the [conference agenda](#) for more details. [Spaces are limited](#) for the EdgeTech on-water

demonstrations.

The Marine Technology Society (MTS) describes the TechSurge event as a joint Navy-Industry-University "Underwater Cables, Connectors and Imaging Systems" 3-day working session.
