

# Geospatial Analysis Demonstration Session with Geosoft

Geosoft will be providing a demonstration session titled 'Seeing Beyond the Seabed' in Access Grid Room 124/14 on Thursday 6 April at 10:30 a.m. In this session Geosoft will showcase Oasis montaj and its application for offshore site investigations.

See the versatility of Oasis montaj in geophysical analysis through several client success stories in offshore oil & gas, oceanic studies and UXO (unexploded ordnance). The workflow and powerful range of tools dedicated to locating cables and pipelines, unexploded ordnance (UXO) and other marine hazards will also be illustrated.

The Geosoft team is available at stand G8 throughout Ocean Business 2017 to discuss technical questions and how they can assist you with your upcoming marine geophysical survey projects.
