

Greensea Appoints Heath Hescock As Robotics Engineer

Greensea, creator of OPENSEA, the marine industry operating platform, has appointed [Heath Hescock](#) as Robotics engineer. Heath leads the hardware integration process at Greensea and is primarily responsible for providing Greensea's production staff with software support.

He provides system-level thinking and guidance, drawing from his strong background in hardware design and solid software experience. Mr. Hescock also leads design and development for Greensea's proprietary printed circuit boards (PCBs) used in workboat vessel control systems.

Prior to joining Greensea, Heath automated software functions through programming at Globalfoundries, a world leader in semiconductor production. He earned a B.S. degree in Electrical Engineering from the University of Vermont, a B.A. degree from Vermont Technical College, and is also a skilled carpenter.
