

Hydro International - November/December 2019

The cover photo is a winning submission from Teledyne Marine's annual photo contest. This image shows a Workhorse Long Ranger ADCP being deployed to collect ocean current information.

This issue contains the following articles:

- 7 Questions to Phil Payne of the UK Hydrographic Office
- iXblue Echoes 10 000 sub-bottom imager for object detection
- Mapping the subsea forests of the Mediterranean
- Exploring the Origin of Indian Ocean Geoid Low
- Airborne Multibeam Lidar Coastal Mapping in Paradise
- Hydrographic data delivery and charting for the future
