OI London Expands IT, Communications and Data Solutions

Reed Exhibitions, the organiser of Oceanology International London (OI London), is expanding the event with the launch of the Ocean ICT Expo, a parallel exhibition focusing on the IT, communications and data solutions that form the technical foundation for modern oceanspace research and industry. Taking place in conjunction with Oceanology International 2018 at ExCeL London from 13-15 March 2018, the Ocean ICT Expo is to be a showcase for the most innovative enabling technologies, including satellite communication, data and networking services that facilitate safe, high-speed transfer and use of data from the ocean.

Ocean ICT Expo is a complement to Oceanology International bringing together organisations providing solutions for communications, data storage, networking and analysis, Ocean ICT Expo adds a data-centric dimension to Oceanology International's approach.

Additional Tracks and Seminar Space

The OI conference will expand to include specific Ocean ICT Expo tracks and an additional seminar area within the exhibition, with papers and presentations delivered by leading experts from global software, hardware and communication services companies covering the latest technologies and best use of ICT solutions to enable further progress in data acquisition and analytics.

Exhibition space for the Ocean ICT Expo is available and expected to sell-out quickly.
