

Seafloor Systems Expands Latin American Sales Support Services

Seafloor Systems has appointed Mr. Mauro Romani as sales support engineer for the Latin American market, based in Lima, Peru. He will directly support dealers and customers in Latin America with sales and training as well as product demonstrations for the Seafloor range of echosounders and remote and autonomous survey vehicles.

Mr. Romani, who previously served as a Geotechnical Equipment specialist for Golder Associates based in Lima, Peru, brings his customer service, sales engineering, and technical support experience into this new position, reporting to Josh Grava, vice president of Sales.

Seafloor Systems is known for their turnkey [singlebeam](#) and multibeam hydrographic

survey equipment and [vehicles](#)
