

TDI-Brooks International Acquires Engineering Firm Certification

Effective from 20 January 2017, TDI-Brooks International, Inc. acquired Engineering Firm certification with the State of Texas, USA, due to its extensive experience in the area of offshore environmental, geotechnical and geological site investigations. It has expanded its offerings to include seafloor and subsurface soil engineering services.

Headquartered in College Station, TX, USA, TDI-Brooks strives to provide a professional service to support each client and project by incorporating industry resources, relationships, technology and safe practices. TDI-Brooks has a staff of nearly 100 individuals including 14 PhD-level oceanographers, geochemists, biologists and geologists. TDI-Brook's mission is to safely deliver high-quality oceanographic services, including acquisition, sampling, analysis and scientific interpretation, to the marine

environmental, geochemical, geotechnical and survey marketplace.
