

# Workshop On Board ss 'Hydrograaf'

A workshop themed 'Hydrograaf' was held on board the SS *Hydrograaf* in Rotterdam on 23 September 2016. The afternoon opened with a sightseeing tour of the vintage vessel. Presentations highlighted various aspects of the profession, like developments on Inclinacam and 3D Direct for offshore positioning of monopoles; data management software and the shallow survey week with students from Maritiem Institute Willem Barentz, supported by the industry.

The meeting was attended by 60 members who enjoyed going back in history and hearing about different aspects of the profession.
