

# 2014 Global ADCPs in Action User Conferences

For the past 12 years, Teledyne RD Instruments (TRDI, USA) has repeatedly hosted its biennial ADCPs in Action (AiA) Usersâ€™™ Conference in San Diego, CA, USA. In recent years, TRDI has expanded this conference to other areas of the globe. In partnership with local representatives, TRDI will host its 2014 usersâ€™™ conferences in Europe, Australia and India.

[Teledyne RDI's 2014 global AiA events](#) include: AquaVision's ADCP Workshop hosted 11 and 12 June in Utrecht, The Netherlands; ADCPs in Action in Australia (AiAiA), co-hosted by UVS, 9 and 10 September on the Gold Coast; and ADCPs in Action in India (AiAil), co-hosted by ASB Systems, 23 and 25 September in Goa, India.

AiA is a highly focused event in which Acoustic Doppler Current Profiler (ADCP) and Doppler Velocity Log (DVL) users converge to share their field experience, network with their peers, and attend intensive product and software training sessions presented by TRDI's resident experts.

There is currently a call for local speakers in Australia and India. Questions can be directed to [Margo Newcombe](#).
