

AADI Smart Sensors for CEFAS

RS Aqua Ltd, UK distributors for Aanderaa Data Instruments (AADI) have shipped a further quantity of model 3919B Conductivity (Salinity) sensors to the Centre for Environment, Fisheries & Aquaculture Science (CEFAS) in Lowestoft, UK. The sensors are used aboard the CEFAS Smartbuoy, an in-situ, real-time, coastal monitoring system deployed at various sites around the UK coastline.

The 3919B forms part of Aanderaa's "Smart Sensor" range of high-accuracy, rugged, multi-output format sensors for ocean research and coastal monitoring applications. The specified accuracy for the 3919B is $\pm 0.0018\text{S/m}$ with a response time of less than 3s.
