

# ADCP Product Unveiling at OB

Teledyne RD Instruments is to unveil its new next-generation line of Acoustic Doppler Current Profiling (ADCP) products at Ocean Business 2011. After fifteen years of success, the Workhorse ADCP products will be complimented by the Sentinel V ADCP, the first in a series of V ADCP products based on a new technology platform.

Also on display on booth S1 will be the new long range PAVS150 Doppler Velocity Log (DVL) and Citadel CTD products.

To learn more about all three of these technologies, a Teledyne Marine Product Innovation Preview is scheduled on Monday, 4<sup>th</sup> April in room 104/13 at Southampton University. [Full schedule of events](#)

During the conference, Teledyne RDI will be providing classroom training on the Sentinel V ADCP on Tuesday, 5th April at 3:30 pm. and training on the Citadel CTD products on Thursday at 10:30 a.m. Early registration will secure a space.

It also is possible to stop by in the stand for a V product demonstration and to take part in the launch campaign, where visitors can enter in a drawing for a custom Flip Video Camera.

Follow the V [product launch](#) and/or on the new [Teledyne Marine Facebook](#) page.
