

# ADCPs and CTDs for Oceanographic Research

Teledyne RD Instruments, USA, has announced the official opening of its 2015 Academic Product Grant. The global academic oceanographic community can have the opportunity to utilise these products free of charge for up to a 6-month deployment.

Members of academic institutions worldwide are encouraged to submit applications detailing their proposed utilisation of Teledyne RDI's Sentinel V ADCP, Citadel CTD, or a combination of the two technologies to enhance their oceanographic research. [Full grant detail and an online application form](#) are available online and applications are due by 1 June 2015; awardees will be announced on 15 June 2015.
