

# ADCPs in Action Event in India

From 23 to 25 September 2014, Teledyne RD Instruments and ASB Systems will co-host ADCPs in Action in India at the National Institute of Oceanography (NIO) in Goa. This three-day event will focus on the use of Acoustic Doppler Current Profilers (ADCPs), CTDs and Doppler Velocity Logs (DVLs) for a wide array of oceanographic applications.

Sessions will include presentations given by local customers and guest speakers; as well as training on new products and software; a review of best practices; ADCP data collection, processing and analysis; waves measurement; and a primer on Doppler navigation. This year's event will also include technology workshops presented by AquaVision and Teledyne BlueView. [Full details and free online registration.](#)

For over a decade, Teledyne RD Instruments (TRDI) has hosted its highly successful ADCPs in Action (AiA) Users' Conference through its U.S. and French offices. Due to popular demand, in 2012, Teledyne RDI began to co-host these events in cooperation with their global representatives, successfully bringing this event to customers in key regions such as Australia, India, China and Europe.
