

Advanced Navigation Expands USA Operations

Advanced Navigation has recently expanded existing operations in the USA. The Australian company, specialised in the development and manufacturing of navigation technologies and robotics, aims to better serve the American market.

Investing in operations across the USA will result in faster service, more accurate information and more personalised business transactions. In addition, a new support team based in the USA has also been established providing local customers with faster support.

[Advanced Navigation](#) is still unfolding USA warehousing. This will be a significant advantage for both the company and its customers allowing for next day delivery. The aim is to reduce time and shipping delays for the USA market. The company has specialised

expertise across a broad range of fields including sensors, GNSS, inertial navigation, RF technologies, acoustics, robotics, AI and algorithms.
