

All-Energy Expanding Offer

All-Energy's 'offer' has been expanded to encompass many more associated events, including those organised by UK Trade & Investment (UKTI); and the launch of the Offshore Valuation Study - which will present findings of the first full economic valuation of Britain's offshore renewable resource.

There are also three very different sessions organised by Pushing Offshore Wind Energy Regions (POWER cluster); Education Day for teachers and career guidance specialists, and events looking at such varied interests as Korea, an international brokerage event; an assessment of the feasibility of developing a marine energy innovation centre in the Mersey Estuary; an attempt to demystify the CRC, data centres and implications for the renewables industries; the All-Energy Careers Fair; and post-show Technical Tours organised by Aberdeen Renewable Energy Group (who also have a conference session 'Offshore Wind: Grasp the Nettle - a Call to Arms to the UK Offshore Supply Chain').

Project Director, Judith Patten, says, "With over 450 exhibiting companies from 16 countries and 270+ speakers taking part in the main conference, there is plenty for our visitors to do over the two days, so they need to plan in advance to get the most out of their time with us!"
