

AUV Services Structuring at UTEC

UTEC, USA, appointed Sean Halpin as Global AUV Manager and US Geophysical Manager. One of his key tasks will be the standardisation of UTEC's AUV work practices and development of class leading data products, in order to consistently deliver quality services to our growing number of clients around the world.

A graduate of the esteemed Maine Maritime Academy, Sean began working with hydrographic survey equipment at the age of 18. After university, he worked with a US defence contractor which held contracts to conduct and assist with hydrographic survey work for NOAA and the US Navy.

Immediately prior to joining the UTEC team based in Houston, Sean worked with a deepwater engineering firm where he designed and managed geoscience programmes for oil and gas operators in a consultancy role.
