

C & C Technologies Opens South Asia Division

C & C Technologies, headquartered in Lafayette (LA, USA), is opening its South Asia Division in Visakhapatnam, India, led by J. Srinivasa Raju as its director. This division will provide geoscience services and special projects along the Indian Coast and in Sri Lanka and Myanmar. Services offered will include geophysical surveys, marine construction surveys, soil engineering, hydrographic mapping and physical oceanography.

The staff will initially include five experienced full-time personnel and will be supplemented with C & C's array of worldwide assets.

Srinivasa Raju is the founder of Geo Marine Dynamics (I) Pvt. Ltd. (Geomardy) and has over 15 years of experience performing multidisciplinary engineering and applied research. His background includes the interpretation of geotechnical and geophysical data and the management of innovative subsea geotechnical and geophysical investigations for government agencies and private corporations.
