

# C-MAP NOAA ENC Distributor

From 1 December, 2005 C-MAP Norway has been certified as a NOAA ENC Value Added Distributor.

C-MAP Norway is the authorised distributor of official ENC (Electronic Navigational charts) that holds the largest portfolio of official ENC data. With the latest contribution of ENC from NOAA, C-MAP Norway is now approved to supply official ENCs produced by 34 Hydrographic Offices.

The DNV type approved SENC distribution of official C-MAP ENCs secures that chart data is easily and safe installed in the ECDIS or ECS. Further the C-MAP Real Time Updating service enable end users to update their official ENCs on line using e-mail or Internet. This simplifies the updating process, which now can be carried out quickly, accurately, and securely on the spot wherever you are. Meaning that the official ENCs received from C-MAP will maintain the official status in accordance with the carry requirement regulations for official ENCs.
