CARIS 2007 Call For Papers

CARIS is inviting submissions for abstracts for paper presentations at CARIS 2007, 11th CARIS User Group Conference and Educational Sessions, to be held 5-8 March 2007 in Kuala Lumpur, Malaysia. Attendees of CARIS conferences seek to explore the future of marine and hydrographic geomatics software. They are software users from the entire Ping-to-Chart workflow, with interests ranging from post-processing of bathymetric data, spatial database management, chart production to data distribution. CARIS 2007 organizers are looking for papers that will meet and exceed these expectations. Topics vary in the whole area of hydrography.
CARIS is offering free conference registration for those speakers selected. Abstract submission deadline is 15 November 2006.
