

CEDA Dredging Exhibition

The Central Dredging Association (CEDA) organises the CEDA Dredging Days on 5 and 6 November 2009 in the conference centre of Ahoy Rotterdam, in conjunction with Europort 2009. This year's theme is Dredging Tools for the Future. To complement the conference, a specialised dredging exhibition will be located in the area adjacent to the technical session room.

The exhibition is open during the conference. Companies like DEME, IHC Merwede, Puma and Vosta LMG present their products and services to a select group of international experts and decision makers in the dredging sector.
