

# Chart Distribution Contracts for EVG

East View Geospatial (EVG, USA) has entered into chart distribution contracts with Land Information New Zealand (LINZ) and the U.S. National Oceanic and Atmospheric Administration (NOAA). These charts are suitable for research and bathymetric purposes and as navigation aids.

EVG has recently acquired all New Zealand (LINZ) nautical charts. These charts are available in paper format and in raster format. They cover the North and South Islands as well as Tonga, the Cook Islands, Southern Ocean, and Oceania, including Fiji. The charts are updated with the latest NTMs by LINZ.

EVG has been approved to supply NOAA charts to customers in paper and raster formats. These charts are updated with NOAA supplied NTMs and are the latest available. There is comprehensive coverage of US waters from the Pacific to the Atlantic coasts as well as the Great Lakes, Puerto Rico, the Virgin Islands and Hawaii. Companies aiming to save on nautical chart prices and information about starting a NOAA drop-ship contract or reseller agreement, or companies who are looking for a supplier, are requested to contact EVG.
