

# Chartworx Holland to Provide ECS for Aircraft

Optimare Sensorsysteme AG, based in Bremerhaven (Germany) has taken delivery of nine operational and planning versions of TheMAP 210 Electronic Chart Systems manufactured by Chartworx Holland BV. Six of these systems will be installed by Optimare in the Dornier 228 Aircraft of the Netherlands Coast Guard.

A complete spare system will be kept available on the ground and two systems are available for planning and analysis purposes in the Coast Guard office. The systems have been adapted to fully integrate with the Side Looking Airborne Radar (SLAR) systems on board of the aircraft while special defined layers like Terminal Maneuvering Areas TMA's) and restricted area's can be superimposed over the navigational data as well. All systems are supported by subscriptions to C-MAP by Jeppesen professional digital cartography for

Europe.
