

Chesapeake Introduces SonarWiz.MAP

Chesapeake Technology, Inc. recently released SonarWiz. MAP, their latest in sonar acquisition and real-time mapping technology. Built on top of the mature and stable acquisition software SonarWiz.SSS, SonarWiz.MAP integrates real-time mapping, survey planning, and survey line following in one easy to use and affordable package. SonarWiz.MAP virtually eliminates the post-processing time spent working up sidescan data. SonarWiz.MAP supports over 1,000 co-ordinate systems and is also loaded with interactive tools for adjusting acoustic data during and after data collection. SonarWiz.MAP also imports existing sonar data from other vendors.
