

CIDCO 2015 to Highlight Developments in Hydrography

The Interdisciplinary Centre for the Development of Ocean Mapping (CIDCO), in partnership with Technopole maritime du QuÃ©bec, is organising the CIDCO 2015 Symposium from 18-19 June 2015. The theme of this third edition is 'Innovations and new applications in hydrography'.

The Symposium participants will put forward the latest breakthroughs in hydrography during the different technical sessions:

- Session 1: Subsea Infrastructure Surveys
- Session 2: Innovations in Hydrography
- Session 3: Capacity Building
- Session 4: Decision-Making Tools

The [CIDCO website](#) is available for registration. It also includes more information on the [event's programme](#), the speakers as well as the networking and social activities scheduled during the event.
