

CoastGIS 2013 Call for Paper Abstracts

CoastGIS 2013, the 11th International Symposium for GIS and Computer Cartography for Coastal Zone Management, is to take place in Victoria, British Columbia, Canada, from 18 to 21 June 2013. The organisers invite professionals to submit abstracts for presentations, and proposals for workshops.

Extended abstracts for oral papers and posters, as well as proposals for pre-conference workshops can be submitted via coastgis2013.ca

Following the conference, a peer-reviewed process will select conference papers to be published in either Marine Geodesy or a coastal management journal (to be confirmed), depending on the particular focus of the paper.

Important dates for submissions are 30 November 2012 as the deadline for workshop proposals (by email to coastgis2013@gmail.com) and 15 January 2013 as the deadline for oral paper and poster abstracts (online through coastgis2013.ca).
