

Contract for Marine Site Investigation in Mexico

Fugro, in conjunction with long-time associates Constructora Subacuática Diavaz S.A. de C.V., has been awarded a large survey contract by Mexico's national oil company, Pemex. Offshore operations, including multi-site high-resolution geophysical and geotechnical surveys together with laboratory testing and geoconsulting services, will support design and/or installation of platforms, pipelines, jack-up platforms and deepwater facilities.

Valued at approximately USD 10 million, the contract covers work between August and December 2017.
