

Contract Management for Dredging and Maritime Construction

This two-day conference and workshop, on dredging and maritime construction has been organised by the Institution of Civil Engineers (ICE) on behalf of the Central Dredging Association (CEDA) and the International Association of Dredging Companies (IADC). [The conference counts eight sessions](#), each comprising keynote lectures presented by invited international specialists in the field. Workshop sessions cover amongst others the following key topics: pre-tender information, environmental aspects, the balance between technical and functional requirements, identification of appropriate forms of contract, tender procedures, project finance phasing, liability issues and dispute resolution including forms of dispute resolution, pragmatic approach to dispute resolution and arbitration and the speed of dispute resolution.
