

Data Management Training Courses

OceanWise, UK, has entered into a collaboration with The Institute of Marine Engineering, Science and Technology (IMarEST, UK) to develop and deliver Marine Data Awareness Training Courses in London and overseas. This collaboration combines OceanWise's™ expertise as a provider of technical and management training to the International Hydrographic Organisation (IHO) through its capacity-building programme with IMarEST. The new courses, provided by OceanWise, will contribute to the continuing professional development (CPD) scheme for IMarEST members.

The first course, supported by The Society for Underwater Technology (SUT), is entitled "Providing an overview of Marine Data Management throughout its Life Cycle" and will be taking place at IMarEST offices in Aldgate, London, on Thursday 18 June 2015.
