

# Decommissioning Contract with Hess

Subsea service company DOF Subsea UK has secured a contract with Hess to provide diver-less decommissioning services from its new multipurpose support vessel, the *Skandi Skansen* in the Ivanhoe / Rob Roy Field, North Sea. The project will last for approximately 21 days and is scheduled to start in Q3 2011 representing a revenue of approximately GBP5 million.

The scope of work includes a decommissioning program which involves the engineering and recovery of 4 mid water arches, 8 flexible risers and associated structures and umbilicals.

Garry Millard, Managing Director, DOF Subsea UK says "We're delighted to of been awarded this Contract by Hess. The award of this contract is a significant win for DOF Subsea UK and inline with our strategy to develop our diver-less decommissioning capabilities. We are particularly pleased at securing work for our new vessel, the *Skandi Skansen*, our fourth Installer Class vessel to be delivered. This contract represents one of the first diver-less decommissioning projects in the North Sea and demonstrates DOF Subsea's commitment to our ongoing expansion in the subsea engineering market."
