

Digital Regulations

ChartCo Ltd has formed a partnership with Regs4Ships Ltd to distribute regulations and other ancillary information to be distributed under the brand of RegsManager. With this partnership, the method of distribution will gradually move from CDROM to the on-line solutions of ChartCo broadcast and ChartCo Select.

All the RegsManager data will be held by the ship in a fast and accurate database allowing extensive keyword searching. The service includes regulations, acts, codes of practice, and notices, all designed to provide the relevant documentation to meet the 1998 carriage of nautical publications regulations. Links are provided to the relevant sections of MARPOL, SOLAS and STCW, with regular updates direct from ChartCo.

ChartCo has over 3300 vessels benefiting from the provision of paper and electronic chart updates, weather data, newspapers and updates to British Admiralty electronic products.

Regs4Ships is an ISO 9001 and ISO 14001 company. As a result of this partnership ChartCo will become the sole distributor for Regs4Ships data.
