

# Digital Ship Cyprus Features Digital Maritime Technology

The fourth edition of Digital Ship Cyprus will take place 30 and 31 January 2007 in the San Raphael Hotel, Limassol, Cyprus. The event is a showcase about how innovative digital technologies can add value to maritime operations. For the first time, Jeppesen Marine will present its plans to offer services to the maritime industry, and Inmarsat will present the results of its second comprehensive worldwide survey into the current status of crew calling. On the programme is a training session for FleetBroadband, Inmarsat's new satcom system to be launched in September 2007, a new digital technology showcase, and a Tanker Operator conference about new business requirements from oil companies. [Digital Ship](#) will also host a 22-stand exhibition, providing intimate opportunities to meet the world's leading developers of innovative digital technology for the maritime industry, and an evening dinner on 30 January at a Limassol taverna.
