

Double RIEGL LIDAR 2015 User Conference

Following on from RIEGL LIDAR 2013, which took place in Vienna, Austria, RIEGL has announced that its next International User Conference, RIEGL LIDAR 2015, is to be held in Hong Kong and Guangzhou, China, from 5 to 8 May 2015.

The [international conference](#) in Hong Kong, with English as the primary language, will be held from Tuesday 5 May 2015 to Thursday 7 May 2015. The conference in Guangzhou, with Mandarin and English as the main languages, will be held from Thursday 7 May and Friday 8 May 2015. For every visitor, there will be the option to either participate in the Hong Kong or the Guangzhou part of the conference (or of course in both!), depending on convenience and preference.

The RIEGL LIDAR 2015 user conference will focus on user presentations reporting on projects using RIEGL Lidar equipment, scientific and partner presentations, as well as on the latest developments and product news from RIEGL.

Hong Kong is a world famous, vibrant, and spectacular city. With its Chinese and European heritage, it offers a unique ambience and welcomes guests with amazing hospitality. It has a major international airport, serving connections from many cities worldwide. Entering is straightforward and convenient with most international visitors not requiring a visa.

The nearby located city Guangzhou, in mainland China, is a rising star among the Chinese mega cities with a population of more than 10 million people. The city is known for their high tech production and technology. Guangzhou can be entered by Chinese guests without a visa, and is conveniently connected to Hong Kong by either a 90-minute ferry trip, train connection, or a very short flight.
