

Douglas-Westwood Launch Online Wave & Tidal Database

Douglas-Westwood Ltd. are pleased to announce the official launch of The World Wave and Tidal Database, a unique online data source for the rapidly developing wave and tidal industries. The database contains project information on every identified wave and tidal energy project worldwide, in both operation and planning. More than 30 data fields are included for each project including location, costs, capacity, output, key contacts etc. and a detailed profile for each project is given. The World Wave and Tidal Database offers comprehensive project information in an easy to use and fully searchable format.
