

# DP Position Reference Sensor Agreement for STR

Subsea Technology & Rentals Ltd (STR, UK) has announced an agreement with Guidance Marine to supply its range of position reference sensors for dynamic positioning (DP).

Guidance Marine is a developer and supplier of dynamic positioning (DP) position measurement technologies for high-value offshore marine markets for real-time vessel positioning and manoeuvring.

Designed to meet all IMO DP class requirements, their laser and microwave Artemis, CyScan, RadaScan, RadaScan View and RangeGuard sensors will be available for hire direct from STR's head office in Great Yarmouth.
